PROFILE

Computer Science Engineering student at BIET Jhansi with a strong interest in Backend Development, Java, Python, MySQL, and Data Structures & Algorithms. Solved 200+ LeetCode problems and actively learning software development. Aspiring Backend Developer seeking internship opportunities to gain practical software development experience.

WORK EXPERIENCE & PROJECTS

Student Attendance Monitoring System

Personal Project

Developed an attendance tracking system using face recognition and computer vision concepts.

Implemented classroom entry monitoring and analytics for real-time attendance management. Utilised Python and computer vision libraries to automate student identification and logging.

Achievements & Activities

Ongoing

Solved 200+ problems on LeetCode, demonstrating strong command of Data Structures & Algorithms. Active participant in coding competitions and hackathon preparation events. Consistently improving problem-solving skills through competitive programming practice.

Technical Skills

Core Competencies

Languages: Java, C, JavaScript, HTML, CSS.

Databases & Tools: MySQL, Git & GitHub.

Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS).

EDUCATION

B.Tech, Computer Science & Engineering

Expected Graduation: 2029

BIET Jhansi (Bundelkhand Institute of Engineering & Technology)

Currently pursuing B.Tech with focus on software development, algorithms, and systems design.

Actively building projects and solving competitive programming problems to strengthen practical skills.

CAREER GOAL

Aspiring Backend Developer actively seeking internship opportunities to apply and expand practical software development experience. Passionate about building scalable backend systems, writing clean and efficient code, and contributing to real-world engineering projects. Eager to collaborate with experienced teams and grow as a software engineer.
